

Lever handle model FSB 1051 has veritably come to epitomise FSB. The "Schneider Handle" was one of Johannes Potente's supreme creations and a market leader in the 1960s. It exudes great harmony with its moulded-to-the-hand styling. FSB 1051 is one of four models designed by Johannes Potente now on permanent display at the MoMA in New York.

Recommended rose/backplate variants

Design: Johannes Potente
